EXPERIENCES

RoboWealth Sdn Bhd/ AutoWealth Pvt Ltd, Tun Razak Exchange, Kuala Lumpur - *Technology Lead*

AUGUST 2022 - PRESENT

- Analyzed project specifications and validated business and technical requirements for both web and mobile applications.
- Designed and documented technical architectures, including system diagrams and external system integrations.
- Led engineering best practices and participated in architecture design reviews to ensure scalable and maintainable solutions.
- Reviewed codebases to identify technical risks, enforce code quality and security standards through Vulnerability Assessment and Penetration Testing (VAPT).
- Fine-tuned deployment processes and managed release cycles for web and mobile platforms.
- Participated in disaster recovery planning and executed periodic recovery drills.
- Provided mentorship and technical support to junior analysts and developers, fostering growth and improving team performance.
- Estimated development efforts, evaluated emerging technologies, and proposed improvements to optimize workflows and delivery.
- Delivered interim technical solutions to mitigate the impact of unexpected production issues and maintain business continuity.
- Collaborated daily in Agile stand-ups, aligning development efforts with product and business goals.
- Coordinated with external service providers to scope, translate, and manage delivery of outsourced development efforts.
- Tech Stack: Next.js, React.js, React Native, Laravel, Go, AWS (EC2, S3, RDS, etc.)

CIS IT Solutions Sdn Bhd, Bangsar South, Kuala Lumpur - *Mobile developer*

AUGUST 2019 - JULY 2022

- Developed and maintained cross-platform mobile applications for iOS and Android using React Native.

- Collaborated with cross-functional teams (designers, backend developers, product managers) to define, design, and deliver new features.
- Integrated with external APIs and third-party data sources to enhance app functionality and user experience.
- Wrote unit tests to ensure code robustness, covering edge cases, usability, and reliability.
- Managed incidents, bug fixes, and change requests to ensure app stability and performance.
- Created and maintained training materials and technical documentation for mobile app functionality and business processes.
- Communicated regularly with stakeholders to provide updates, gather feedback, and align development goals with business priorities.
- Investigated user-reported issues to identify root causes and implemented efficient, long-term solutions.
- Integrated notification management tools and live chat features to improve real-time user engagement and support.
- Conducted server stress testing to evaluate system resilience under high load scenarios.
- Successfully deployed mobile applications to the Google Play Store and Apple App Store, ensuring compliance with platform requirements.
- Tech Stack: React Native, REST APIs, Firebase Notification, App Store / Play Store deployment tools

GHL ePayments Sdn Bhd, Bandar Sri Damansara, Kuala Lumpur - *Intern/ Mobile analyst*

FEB 2018 - AUGUST 2019

- Collaborated closely with business analysts and application designers to define and enhance new features and modules.
- Translated business requirements and concepts into scalable, efficient, and standards-compliant code.
- Built functional prototypes during the technical scoping phase to validate feasibility and approach.
- Developed and maintained front-end solutions for merchant-facing mobile applications using React Native.
- Designed and implemented RESTful API endpoints in PHP for both internal tools and external integrations.
- Conducted continuous research on emerging trends and technologies in mobile development to inform architecture and tooling decisions.
- Authored technical specifications, test guidelines, and detailed documentation to ensure alignment and clarity.
- Delivered Level 3 support, including advanced troubleshooting and root cause analysis for critical issues.
- Communicated regularly with management to provide progress updates, flag obstacles, and propose solutions.
- Tech Stack: React Native, PHP, REST APIs, Git, Postman

PROJECTS

GHL ePayments

- Developed custom SDKs/plugins (React Native, Cordova, Ionic) to streamline merchant integration, reducing onboarding time and improving developer efficiency.
- Built an internal web platform to optimize the transaction refund process, integrating secure authentication for risk team access.
- Created a merchant-facing mobile app in React Native with real-time sales tracking and data sync across iOS and Android, enhancing operational insight and decision-making.

CIS IT Solutions

- Built and deployed multiple React Native e-commerce apps, each tailored for different business models:
 - Tiered commissions, PWP features, and notification systems to boost user engagement and sales.
 - Credit Rewards system allowing users to earn and redeem points.
 - Education platform with a hierarchical downline view, supporting both online and physical course purchases.
- Integrated each app with local payment gateways, and deployed to App Store and Google Play.

AutoWealth

- Developed client, agent, and staff-facing platforms using Next.js, improving UX and workflow across both B2C and B2B segments.
- Built the mobile app from scratch using React Native, and continuously enhanced its features to ensure smooth, high-performance functionality across both iOS and Android platforms.
- Created a Laravel back-end supporting business logic, API integrations, and regulatory-compliant features like fund segregation.
- Deployed web and back-end on AWS and on-premise bank servers, with secure LDAP integration and support for legacy (EOL) environments.

EDUCATIONS

Universiti Malaysia Pahang, Pahang - *Bachelor Degree of Computer Science in Software Engineering with Honors*
